

Keeping Your Patients and Your Office Safe:

Shipping DiagnosTechs Test Kits Directly to Your Patients

In these challenging times, we know it is still important for you to take the best possible care of your patients. Complete care often requires laboratory testing that you give to your patients to take home, so they may provide samples to DiagnosTechs.

DiagnosTechs understands that many of you are utilizing remote and telehealth sessions with your patients in response to the health emergency we are all facing today.

We can help ensure that you can still deliver healthcare testing. DiagnosTechs can ship our home testing kits directly to your patients! You can consult with your patients using remote consultations, and recommend the necessary testing you typically authorize.

Then, you can order your choice of DiagnosTechs test kits shipped directly to your patients.

To order tests for direct shipment to your patient, you can:

- Order online by logging in to the DiagnosTechs Provider Portal and order a drop shipment directly to your patient's address.
- Call a DiagnosTechs customer service representative at 1-800-878-3787, and request a direct shipment that way.

DiagnosTechs is here to help you in any way we can to provide the same quality healthcare you have always given your patients. Just let us know how we can help!
