

Complete GI Parasite List

Organisms in bold are commonly identified in laboratory samples

Protozoa

Balantidium coli

Blastocystis hominis

Chilomastix mesnili

***Cryptosporidium* spp.**

Cyclospora spp.

Dientamoeba fragilis

Embadomonas (Retortamonas) intestinalis

Endolimax nana

Entamoeba coli

Entamoeba hartmanni

Entamoeba histolytica

Entamoeba histolytica/E. dispar

Entamoeba polecki

Enteromonas hominis

Giardia lamblia

Iodamoeba butschlii

Isospora (Cystoisospora) belli

Sarcocystis spp.

Helminths (worms)

Ascaris lumbricoides

Capillaria hepatica

Capillaria philippinensis

Clonorchis sinensis

Dicrocoelium dendriticum

Diphyllobothrium latum

Dipylidium caninum

Echinococcus granulosus

Echinococcus multilocularis

Enterobius vermicularis

Fasciola hepatica

Fasciolopsis buski

Heterophyes heterophyes

Hookworm spp.

Hymenolepis nana

Hymenolepis diminuta

Metagonimus spp.

Opisthorchis felineus

Opisthorchis viverrini

Paragonimus africanus

Paragonimus kellicotti

Paragonimus westermani

Schistosoma haematobium

Schistosoma japonicum

Schistosoma mansoni

Strongyloides stercoralis/spp.

Taenia spp.

Taenia saginata

Taenia solium

Trichostrongylus spp.

Trichuris trichiura
